Electric Reach Trucks

MOVING YOU FURTHER

HYUNDAI HEAVY INDUSTRIES

■ Photo may include optional equipment

Your satisfaction is **our priority!**

Hyundai introduces a new line of **9-series** battery forklift trucks. The newly designed sit-on reach trucks provide every operator comfortable driving, increased productivity and easy maintenance.

■ Photo may include optional equipment

Compact forklift with proven AC technology

- **Maximum performance**
- **Comfortable operating room**
- **Curve control system**
- **Load indicator (optional)**
- **Camera (optional)**
- **Auto Tilt Levelling (optional)**

Superior Power & **Optimal Performance**

Minimum Turning Radius

Compact design suitable for narrow aisle operation guarantees work efficiency and maximum space utilization.

Versatile Reach Stroke

Multi-roller reach assembly provides for a smooth, controlled and safe load handling system, extended reach allows unsurpassed versatility.

■ Photo may include optional equipment

Efficient, smooth running and powerful performance make your work more productive.

14/16/20/25BRJ-9

Automatic Center Position at Starting

When the key ON, prox switch detects the position of drive wheel, and the wheel turns to the center position automatically.

Electro Magnetic Brake

Increased brake torque and brake stability by electromagnetic load wheel brake.

Forward/Reverse (FWD/REV) Switch

The Forward/Reverse control provides the operator with precise and smooth directional control.

State-of-the-art Hydraulic System

The latest large-capacity hydraulic system reacts quickly during operation and the low noise control valve increases both efficiency and durability.

Drive Motor & Pump Motor

Efficient AC motor guarantees reliability and an optimized motor design provides for low noise levels. Temperature sensor ensures long motor life.

High Technology ZAPI Controller

The efficient, almost noiseless, 8kHz(high frequency) controller provides smooth quite operation and protection for low & high voltage, overheating and fault recording.

Energy Efficiency

H (High) mode: 100%
N (Normal) mode: 110%
E (Economic) mode: 120%

Reach Cutback Control

Reach cutback control system reduces a reach in/out speed automatically at reach in/out end to suppress a shock and to secure a user safety & comfort

Traction Speed Cutback

Traction speed will be reduced automatically in case of mast going higher than free cylinder section for better user safety

End-Tip Cut Back

Lift speed will be reduced automatically at 100mm prior to lift-end to suppress a shock for securing a user safety & comfort

Excellent Grade-ability Operation & Anti Roll Back

Anti Rollback system offers protection against the machine rolling back on a ramp in combination with exceptional ramp start capabilities.

Optimised Ergonomics & **Advanced Safety**

Newly Designed Steer Control Handle

A newly designed steering control coupled with our new Electric Power Steering control gives the operator exceptionally smooth and controlled steering for tight spaces.

Proportional Fingertip Control

Minimal operator effort is required for precise, safe and productive control. The operator can control the machine very easily at fingertip.

Non-Slip Floor Mat

A heavy, vibration dampening, non-slip floor mat reduces operator fatigue and allows for increased productivity.

Break Pedal

Smoother breaking is assured by the balanced design of the pedal and maintenance costs are lowered, as the cover is easily replaceable.

The safely designed driver's space makes your operating more comfortable.

14/16/20/25BRJ-9

Excellent visibility for safe operation

Optimized lift cylinder arrangement provides operator with wider visibility.

Comfortable Operator Environment

A practically designed full suspension seat is fully adjustable for optimum operating position, reducing operating fatigue. *Fabric seat (STD), PVC seat (optional)

Strong Overhead Guard

The safety overhead guard meets ISO 6055 and ANSI regulations and protects the operator during hazardous work.

Headrest Cushion Pad

A large and soft cushion pad is positioned for operator's safety and comfort.

Cup Holder, Console Box & Storage Space

Additional storage spaces are located inside the operating space for operator's convenience.

Camera & LCD monitor (optional)

A camera installed on fork side provides the operator with another excellent visibility. (Apply to mast over TF700)

Durability, Easy Maintenance

Maintenance

Battery Disconnect Lever & Hazard Switch

DC-DC Converter

DC-DC converter satisfied with UL & CE prevents from short circuit overload and reverse polarity.

Easy Battery Replacement

Reliable MOSFET Type Controller

Concentrated Fuse Box for Easy Inspection

Hydraulic Filter

■ Photo may include optional equipment

An ideal arrangement of components ensures easy access and convenience for maintenance.

The LCD colour monitor with 3.5-inch graphic smart display allows the operator to easily and efficiently control the machine. The monitor provides information about speed & accelerator level, steer angle & travel direction, battery discharge indicator, hour meter & working mode. The optional load indicator displays the load weight in the monitor. The optional indicator displays the height of fork in the monitor. The operator can select various performance modes to meet all working conditions. It is available multi-languages (maximum 11) for operator.

The monitor also displays information about operation error, system fault, battery level, hour meter plus other various functions. It enables the operator to maintain the forklift in optimum operating condition.
